FASTER & SAFELY
FROM THE GROUND

LIGHTWEIGHT
& DURABLE

4650 LPM

A skyVac[®] bestseller - With feisty suction AND blow function.

Compact, lightweight & Powerful (1400 Watts). The skyVac[®] Mighty Atom is a great all-round mains powered wet & dry vacuum for domestic and commercial use.

With featherlight poles, the skyVac[®] Mighty Atom is available in 3 "height packages" to reach gutters up to 3 stories / 34ft / 10.5m high. The inbuilt 50mm cyclonic side entry port propels fast moving gutter debris around the sides of the solid polypropylene drum, to minimise blockages and maximise capacity.

The "click-lock" hose attachment makes for a quick on site set up. No time-consuming screwing in hoses and wearing out threads. The 50mm wire reinforced suction hose, is lightweight and kink resilient with a smooth inner passage. So, it's a fast "pole to port" debris journey, without the weight and cumbersome kinks that can slow you down.

There's just one Atom filter, that's all you need. Keep it clean and replace every four months to keep your system in powering through the gutter growths. As for emptying, simply remove the vac head, and tip the leaves, moss, twigs, and other gutter debris into the recycle bin or in the customers flowerbeds. Make sure to get permission first!

DOMESTIC & LIGHT COMMERCIAL USE

IDEAL FOR:

- Gutter cleaning (up to 3 storeys high)
- High-reach vacuuming (Internal & External)
- Leaf blowing (added blow function feature)
- Wet and dry pick up (indoors or outdoors)
- Pond dredging
