

skyVac®

COMMERCIAL PLUS

Supercharged

The skyVac® Commercial 75 PLUS offers the best of both worlds. Power, performance and capacity for effective gutter clearance, along with ease of handling, thanks to its lightweight construction.

The 3 x motor 3300-Watt system delivers 100" water lift along with 11,750 LPM air flow making it ideal for everyday domestic and commercial gutter clearance.

The compact vacuum head is designed to maximise the drum capacity. The filter is housed behind a protective steel plate that lines up with the 50mm cyclonic entry port, to minimise blockages and guide debris around the drum to optimise space. This steel plate deflects dirt and debris that could cause filter damage, and doubles as a sturdy vac head stand. The cleated filter cartridge is removable and easy to clean.

The polypropylene drum is hardwearing, robust and lighter than the standard steel drum. Mounted on a sturdy trolley, with a tipping chassis for ease of emptying, the skyVac® Commercial 75 PLUS has oversized rear wheels for stability and lockable multi-directional front castors.

IDEAL FOR:

- Gutter cleaning (up to 4 storeys high)
- Professional everyday gutter clearance projects
- From top up cleans to stubborn gutter blockages
- Easy debris removal
