

DOMESTIC & LIGHT COMMERCIAL USE

# Loncin slipStream<sup>®</sup> Pro 20

Take patio and driveway cleaning to the next level with the Loncin Slipstream Pro 20. With a convenient key start feature for ease of use and 20" Surface cleaner, you are guaranteed peak precision and efficiency, with huge time and energy savings.

This system is designed to keep waste matter on the ground- instead of on the operator or the surrounding areas! The featured skirt keeps dislodged dirt and water under control. These aspects make the Pro 20 ideal for keeping dirt at bay so you can clean without having to worry about any mess escaping!

The powerful engine moves 15 LPM of water, more than enough to allow the surface cleaner to power through the square metres of paving. Other convenient features include low oil shut down, return to tank bypass, and adjustable pressure regulator. The suction/return hose has a weighted filter so that particles do not cause damage to your machine, thus preserving your surface cleaner.

It also features a flow controller so that you have full control over the performance of the pressure washer and how it performs. Additionally, it also features an easy bleed valve for quick priming of the surface so that you have everything you could possibly need for your surface cleaning.
