

DOMESTIC & COMMERCIAL SURFACE CLEANER

slipStream® Pro 20 X

Take your patio and driveway cleaning services to the next level with the SlipStream Pro 20 X Package. Containing all the features of our highly successful Pro 20 has, but packed with even more power and improved functions.

Whether you're dealing with large dirty driveways or paths, discoloured block paving or patios that require a little bit of TLC, the Pro 20 X enables you to soar through all of these areas both quickly and efficiently, making it ideal for larger industrial, commercial or domestic properties.

It features a flow controller to give you complete control over your cleaning and allow for alterations depending on your cleaning needs. There is also an easy bleed valve for quick priming of the surface so that you can get to work as soon as possible, resulting in time and energy savings. This package comes complete with a variable fan lance, power hose, and a suction/return hose; the suction/return hose has a weighted filter so that damaging particles do not enter your machine and hinder its performance over time, thereby prolonging and preserving your surface cleaner.

There is also the option to upgrade with a Turbo Lance; this would allow incredibly powerful precision cleaning as the lance includes the Turbo Nozzle, helping you to clean smaller areas such as paving edges, corners, and narrow spaces. The Turbo Upgrade would also include an extra 10m power hose, allowing for extra flexibility in your cleaning.
