TRADESMAN

Meet the skyVac Tradesman. This dual motor, 2800W beast delivers the suction power you need for any gutter cleaning job. It packs a punch with a water lift of 110 inches and airflow at 7666 LPM.

Designed for maximum efficiency, the robust vacuum head keeps blockages at bay. The protective steel plate protects the filter, and lines up with the Cyclonic Side Entry Port, ensuring smooth operation and minimising blockages even when the messiest debris comes your way.

The tough Tradesman features a stainless-steel drum mounted on a sturdy tipping chassis. Oversized rear wheels and lockable front castors deliver stability and ease of movement around any site.

Key features:

BLOW PORT: Perfect for quick clean-ups, from blowing away leaves to clearing roof moss and pine needles – this will be your new best mate.

STEEL TROLLEY: It comes with a steel trolley that has all-terrain wheels, enabling you to move easily on uneven ground. The multi-directional castors make it easy to steer and the lockable feature allows you to “park” your vacuum on steep spaces. Featuring a cyclonic port, to reduce blockages.

TRADESMAN skyVac®

Mobile Wet & Dry Industrial Gutter Vacuum

IDEAL FOR:

- Gutter cleaning (up to 4 storeys high)
- Industrial and commercial gutter cleaning for wet and dry application
- Immense lifting capability for the most stubborn gutter growths
